

Ensure everyone in your community has access to COVID-19 testing!

ARIZONA DEPARTMENT
OF HEALTH SERVICES

Underserved communities, unsheltered individuals, and those living in correctional facilities have been hit the hardest by the pandemic. We want to show those communities and facilities that we are still here for them.

The ADHS mobile vaccination program is here to provide COVID-19 testing access for all Arizonans who want it. Our program focuses on unsheltered Arizonans and those residing in correctional facilities; however, all community partners who work with diverse or traditionally underserved communities statewide are encouraged to fill out our easy online request form. In coordination with partners like you, we will send our mobile testing partners anywhere in the state to provide short to medium term “pop-up” testing sites.

Complete our [easy online form](#) to select the type of event, or request any necessary ADA accommodations.

Or email ryan.fore@azdhs.gov to schedule an event tailored to your community’s needs.
